Debug Output - Final version

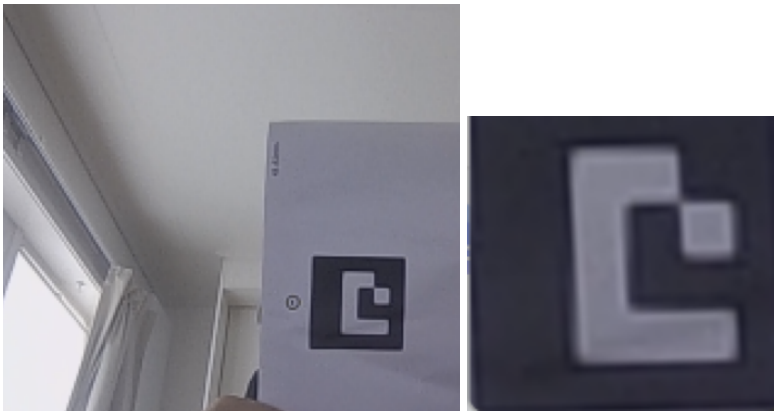

Debug overlay shows corners of recognized and read marker.

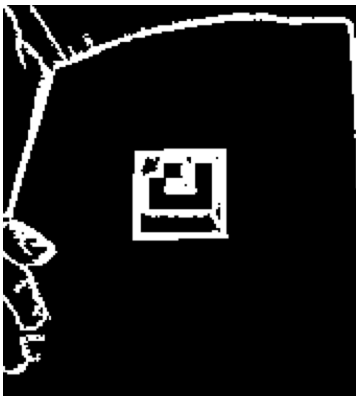

```
Number of detected markers: 1
Detected Marker ID: 1
, Zoom:  0.66, X: -12.2, Y: 3.5, Z: 16.8
```

Log of the read ID of the marker, zoom (relative distance to marker) and rotation in all 3 axis.

Debug Outputs - Older versions

First ever flattened output,of a marker, flattened version is outputed in a new window.

Early binary image output.
